

Carlton Fields Technology Services

**CARLTON
FIELDS**

Litigation Support

- Pre-litigation due diligence
- Litigation exposure analysis
- Managing e-discovery
 - Document assembly
 - Document preservation (data hosting)
 - Data collection and processing
 - Data analytics (conceptual searching/predictive coding/technology assisted review)
- Next generation trial, mock trial, and deposition technologies, including remote participation tools, paperless exhibit systems, and evidence/witness management platforms

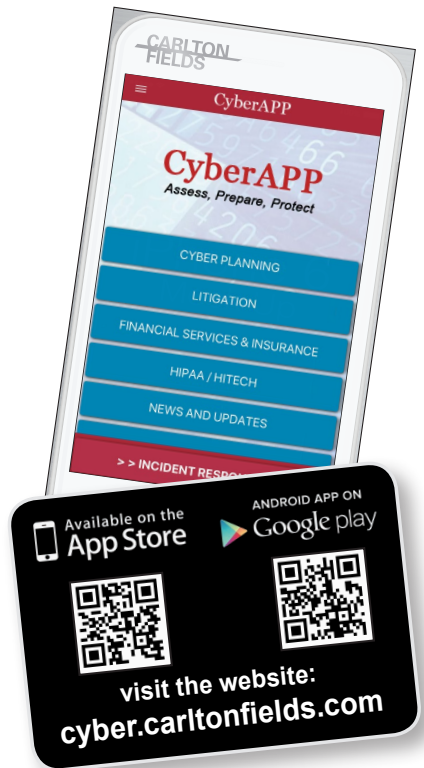

Data Hosting

- Data hosting and storage in a secure environment
 - Charges assessed only for data relevant to the matter, while holding clients' source data free of charge
 - Highly competitive rates (\$5 per gigabyte per month)
 - Great results (e.g., clients have saved up to 300%, one client moved 7 terabytes of data from an AmLaw 10 firm due to lower cost and superior ability to organize data)
- CF has ISO/IEF 27001:2013 certification, the most widely adopted information security standard in the world and the highest level of security-related accreditation a business can achieve, in every office.

Cybersecurity and Technology Services

- Our attorneys and senior IT staff collaborate with clients to develop a seamless strategy and approach that ensures our clients' businesses are both technically prepared and compliant with all governance and regulatory requirements.
 - ◉ Incident response plan review/updates
 - ◉ Document retention (physical and technological) guidelines review/assessment
 - ◉ Physical security assessments and training
 - ◉ Data privacy/GDPR briefing and Q&A
 - ◉ Third-party audits – response, compliance, and post-audit remediation of information security matters
 - ◉ Wire fraud email investigation assistance
 - ◉ Website defacement investigation assistance
 - ◉ Phishing awareness, training, analysis, and testing
 - ◉ Disaster recovery/business continuity planning and assessment
 - ◉ Project management for infrastructure or operational projects
 - ◉ Vendor management program development
- Design and implementation of expert systems and advanced data analytics strategies

Created and updated by Carlton Fields, **CyberAPP: Assess, Prepare, Protect** offers resources that help companies defend against cybersecurity threats, and respond if breached.
