

# No Password Required: A Corvette-Driving Research Scientist Who Built His Own Video Games

July 30, 2021

The *No Password Required Podcast* is dedicated to introducing and celebrating the practitioners, leaders, researchers, and individuals who are shaping the cybersecurity industry. Join us for an in-depth conversation that explores our guests' personalities, expertise, and the path that led them into cybersecurity. The team also discusses current cyber threats and readiness tips for security professionals and business leaders alike.

Dr. Greg Hall is a Research Scientist at the Institute for Human-Machine Cognition and the University of West Florida. Dan is a Corvette-driving car lover who considers ALF to be one of the classics and has great taste in hats. He also does research in full-spectrum cyber operations and contributes to the Florida Cyber Range, a digital platform that provides training and testing solutions for academic, government, military, and industry. In this episode, Dr. Hall joins the No Password Required team to talk about his research in full-spectrum cyber operations, why the sit-and-spin has made a place in history as the best (and possibly most dangerous) childhood toy, and more. Ernie, Clabby, and Pablo discuss the government's Rewards for Justice Program and the new \$10 million reward. In the "Positively Cyber" segment, Pablo challenges Clabby by welcoming Harvey Specter to our fictitious cybersecurity organization as a Privacy and Cybersecurity Lawyer.
