

# Carlton Fields Builds Litigation Budgeting Tool with Neota Logic

November 01, 2019

Carlton Fields was featured in an *Artificial Lawyer* article about the internal litigation budgeting application the firm developed using Neota Logic. The tool is one of many internal and client-facing applications Carlton Fields is developing using Neota Logic, [the world's leading AI automation platform](#). "Neota Logic allows us to build and deploy applications quickly to engage with clients in new ways while enhancing our client service and adding value," said C. Peter Hitson, Carlton Fields' director of legal project and practice management.
